6 Not Private Households
790k
1.5%

UK Adults of UK

**60 Active communal population –**  
 Generally this is accommodation that may be unoccupied for part of the year, or where the people living in the accommodation regularly change. Other active communal accommodation might include hostels, children’s homes, refuges and local authority accommodation for travellers.

**61 Inactive communal population –**  
 These people may be in communal establishments but unlikely to be active consumers. This includes care homes, hospitals, and other medical or nursing establishments where due to their health, the residents are unlikely to get out and about to function as regular consumers. It also includes prisons.

**62 Business areas without resident population –**  
 These are postcodes where we believe there is no regular resident population. An example of this might be a business or industrial park.

These are postcodes where the bulk of the residents are not living in private households.

The category forms a single group, R: Not private households, which is sub-divided into three types:
